

WHAT IS CLAIMED:

1. A method of electronically sharing voice to text templates for document generation, comprising the executable instructions of:

identifying a first and second user;

establishing a peer to peer connection between the first and second users;

- 5 assisting an identification of one or more voice enabled templates associated with the users; and

assisting in a display of one or more of the voice enabled templates between the users.

2. The method of claim 1, further comprising:

recording the display of each template as well as a recipient of each template and a transferor of each template.

3. The method of claim 2, further comprising:

collecting a fee from the recipient.

4. The method of claim 3, further comprising:

providing a royalty to the transferor.

5. The method of claim 4, further comprising:

retaining a transaction fee from the fee prior to providing the royalty.

6. The method of claim 1, wherein the voice enabled template is operable to interface with an audio device to generate a document from the template.

7. The method of claim 1, further comprising:

providing a directory listing of the templates to the users.

8. A method of indexing voice to text templates for document generation, comprising the executable instructions of:

identifying one or more voice enabled templates on one or more computing devices

- 5 recording one or more references to the templates; and

providing a listing which includes the references, wherein the references are operable to be communicated to each of the computing devices.

9. The method of claim 8, further comprising:

establishing a peer to peer connection between a first computing device and a second computing device for purposes of retrieving a remote voice enabled template using the listing.

10. The method of claim 8, further comprising:

associating meta data with each reference within the listing.

11. The method of claim 10, wherein the meta data includes at least one of a rating, an owner name, a transfer rate, and an edit date.
12. The method of claim 8, further comprising:
- providing access to the listing to one or more authorized entities.
13. The method of claim 8, further comprising:
- categorizing the listing by one or more subject matters.
14. The method of claim 8, further comprising:
- permitting the computing devices to search the listing.
15. The method of claim 8, further comprising:
- recording a transaction wherein one of the templates is displayed between the computing devices.

16. A method of displaying a voice to text template for document generation, comprising the executable instructions of:

identifying a first device with a first voice enabled template;

facilitating the displaying of the template to the second device; and

5 using the template to interface with an audio device to generate a document.

17. The method of claim 16, further comprising:

recording the displaying for purposes of at least one of a report and a billing.

18. The method of claim 6, further comprising:

replacing one or more text substitution strings with one or more text values converted when interfacing with the audio device, the text values inserted into the document.

19. The method of claim 16, wherein the facilitation occurs by establishing a peer to peer connection between the devices.
